

I am a consultant paediatrician in Neurodisability working in Bolton. My role spans across community paediatrics and child and adolescent mental health with a particular focus on learning disability; Neurodevelopmental Disorders and complex health needs. I also have associated roles in providing oncall cover to the joint agency review processes in Greater Manchester (SUDC) for sudden and unexpected deaths in childhood. Alongside this I am the Designated Doctor for Child Death in Bolton and work alongside multiagency colleagues reviewing and learning from child deaths in our local Child Death Overview Panel (CDOP). Outside of work I have a busy life running around after teenagers. I try to keep myself fit and active enjoying walking in the abundant hills and open spaces that Lancashire has to offer as well as socialising with friends and family home and abroad!
