

Tal Woloncewicz

Hi, My name is Tal and I am a 5th Year Medical Student at the University of Manchester based in Royal Preston hospital. I have a strong interest in paediatrics as well as teaching. I am currently President of the Paediatric society in Preston and my aim is to help improve and support other students in their understanding of paediatrics as a speciality. Within my role I hope to encourage more students to engage with the speciality and promote high quality teaching for all in classrooms, on the wards and in all other formats.
