

Hi, my name is Tobias (Tobi) Gumm, I am a fifth year medical student at the University of Manchester in Preston with an interest in paediatrics. As the president of the UoM Preston Paediatric Society, I aim to connect students with the specialty and inspire them to become future paediatricians. In my role as student representative for the Manchester Medical Society Paediatric section, I hope to further achieve this goal by promoting engagement and opportunities within the field.
