# LIVERPOOL HEAD & NECK ULTRASOUND COURSE

## COURSE OVERVIEW

This **2 day course** and workshop will help develop a systematic approach to scanning techniques pertinent to **head and neck ultrasound** and utilise **strength of neck US to its full potential**. Course delegates will get plenty of opportunity to practice these techniques **during Hands on workshop**.

The series of lectures will cover **constituents of the neck, main anatomical landmarks and their associated pathologies**.

The course will cover use of **cytology** in US-guided FNA techniques, including the context of **One Stop Clinic**. The expert panel (containing **cytopathologist**) **discussion** will help develop the concept to **improvise the sampling techniques to improve adequacy of cytology samples**.

Panel **discussion** will also offer an opportunity to **discuss the challenges in setting up FNA clinics**.

Course will cover use of **core biopsy** in neck pathologies, **core biopsy techniques** and **hands-on practice**.

Overall the course will provide an all rounded approach to **head and neck ultrasound, including sampling techniques** reinforced by hands-on practice sessions

**This Course Attracts 13 CPD Points  
As Per The RCR CPD Scheme**

**Registration Now Open! Early-Bird Fee Of £325  
Ends On 31st March 2026
